RE:     *Structural Observation Summary*  
          *Issaquah Middle School #6 – Wall 7a & 11*  
          *Integrus Project No.21811*

To whom it may concern:

As engineer of record for the referenced project above, the project engineer and I have observed the construction of the Middle School Wall 7B permitted through the City of Issaquah under permit #BLD20-00013 at different phases from foundation placement to final shotcrete wall facing.

Major items observed include:

1. Wall foundation placement.
2. Concrete retaining wall placement.
3. Shotcrete wall placement.
4. Connections to adjacent permit items (ie Building Permit 1 steel connections to Wall 11).

To the best of my knowledge all observed items were installed in accordance with the construction documents or approved changes. Final approval of the project is also based on a letter dated September 2, 2021 from Krazan & Associates, Inc. who performed the required special inspections stating that all work inspected was performed in accordance with the approved drawings and engineer approved changes.

This letter is sent in conformance with the 2015 IBC requirements to finalize the project. If you have any questions or comments, please do not hesitate to call me.

Sincerely,

INTEGRUS ARCHITECTURE, P.S.

Theresa H. Daniel, P.E., S.E.  
Structural Engineer/Associate Principal
